

Chad Hicks (Owner of Dent Magic) repaired a left wing on a \$6,000,000 Beechcraft King Air B200-GT. The plane struck a large bird while descending to land and damaged the wing. If sent back to Beechcraft for the repair, it would cost approx. \$15,000. The owner called Chad and within hours the plane looked like brand new costing the owner a fraction of what it would have cost him to send it back to the factory.
